

FALL 2026 EXAMPLE - INDIVIDUAL STUDENT SCHEDULE - M1/PA1

This calendar includes lectures and small groups for one individual M1 or PA1 student for the Fall 2026 semester as an **EXAMPLE** of what an individual student might expect in terms of weekly hours in class.

Your schedule is unlikely to exactly match this example as individual schedules vary depending on which labs and small groups each student is assigned. Almost all educational activities will be in person this fall, but if that is not the case, it will be noted on your individual schedule.

In addition to the lectures and groups listed here, students will be individually scheduled for three 2-hour clinical experiences, the first of which may be scheduled as early as week 2.

This schedule is current as of the date published, but changes may be made before the start of the semester.

		Color Key:	Anatomy	CAPS I	MAS I	Foundations	MOHD I
August	1		17	18	19	20	21
		8:00 - 8:50	Foundations of Cellular Life	Foundations of Cellular Life	Foundations of Cellular Life	Foundations of Cellular Life	Foundations of Cellular Life
